PROFILE

IT Support with 2+ years of experience managing networks and IT equipment across Indogrosir (Indomaret Group) stores and warehouses. Focused on network and system administration, with MikroTik, Windows Server, and Linux Ubuntu as the main technologies. Day to day this covers LAN troubleshooting, device maintenance, and PostgreSQL data queries to keep systems reliable. Also runs a self-managed Linux VPS for Docker-based web services.

WORK EXPERIENCE

EDP (IT Support)

Jan 2022 - Present (4 years 9 months)

Indogrosir (Indomaret Group) · Full-time

Sukabumi

- Troubleshoot MikroTik-based LAN networks across store and warehouse areas, most often resolving IP conflicts on handheld devices.
- Provide technical support to internal staff, carry out routine maintenance on PCs, printers, handhelds, and CCTV, and support Windows Server operations.
- Support the warehouse picking programs (DPD, DCP, scanner, handheld, relbar), mainly fixing DPD data issues used to select items during picking.
- Run PostgreSQL queries for data checks, use the previous day's simulation data when recovery is needed, and fix internal PHP web applications.

Android Developer

Jul 2021 - Sep 2021

KOZII.ID (PT Kozii Emas Nusantara) · Contract

Central Jakarta

- Built online shopping app features with Kotlin (MVVM, Hilt) and Firebase.
- Tested API endpoints with Postman before integrating them into the app.

Web Developer

Jan 2020 - Mar 2020

PT. Arkamaya · Internship

Bandung

- Developed a notary website with CodeIgniter, jQuery, and MySQL, collaborating with the team through GitLab.

PROJECTS

Self-managed deployment and administration of a Linux VPS (Ubuntu 24.04): installing and configuring Docker and Coolify, deploying each application as a container, and setting up a domain or subdomain per service.

- **MPTI Lab** (mptilab.com): project monitoring system with a Laravel web app and a FastAPI (Python) ML service.
- **Prediksi Kopi** (prediksikopi.com): coffee pH prediction built with Laravel, a Python ML service, and a MySQL database.
- **Edelweiss Detection** (petaniconservation.tech): edelweiss health detection built with Laravel and a Python ML service.
- **VannameiConnect** (vannameiconnect.com): vannamei shrimp trading platform built with Laravel.

EDUCATION

B.Sc. in Informatics Engineering · Universitas Nusa Putra · Graduated

2022 - 2026

Software Engineering · SMK Pasim Plus Kota Sukabumi

2018 - 2021

TECHNICAL SKILLS

Networking	MikroTik, LAN troubleshooting, IP conflict handling
Server & OS	Windows Server, Linux Server (Ubuntu), Docker, Coolify
Web Services	Web application deployment on VPS, PHP, Laravel, JavaScript
Database	MySQL, PostgreSQL, SQLite, Firebase (NoSQL), JSON data exchange over APIs
Security	Network security fundamentals (Cisco CyberOps Associate)
Soft Skill	Problem solving, adaptability, teamwork, communication

CERTIFICATIONS

MikroTik Certified Network Associate (MTCNA) · MikroTik, 2026

CyberOps Associate · Cisco, 2026

Linux Essentials · Cisco, 2026

HCIA Cloud Service · Huawei ICT Academy, 2026

Laravel & Docker · BuildWithAngga, 2026

Progressive Web Apps (PWA) · Dicoding, 2020
